### Prioritization for Primary School Students

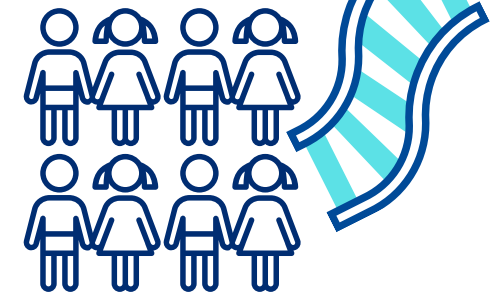

Jan '21-March '21

**35%** of countries in our survey were fully in-person, of which **3 in 5 countries** were prioritizing primary students for in-person learning

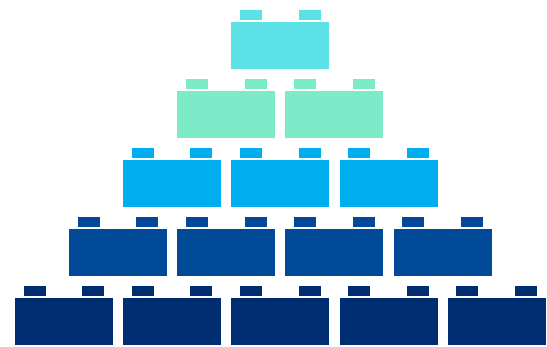

July '21- Sep '21

**60%** of countries in our survey were fully in-person, of which **5 in 7** were prioritizing primary school students for in-person learning

A setback during the early years can persist and widen the learning gap over the years

Primary education provides a strong foundation for reading, writing, and math
